1. THE CORE PHILOSOPHY

* Parallel Play: Each player builds their own, private deck. You never touch, take, or interfere with an opponent's cards.

* Positive Progression: Players race to reach goals, not to defeat an opponent.

2. EQUIPMENT

* Your Deck: 30 cards per player. With at least 5 goal cards

* Goal Cards (Orange border): Take all your goal cards out of the deck and pick 3 random goal cards to be placed in the center, representing objectives.

Other players side

Goal card

Your side

* Your deck can only have one of each card (Card with same name) except for Support cards.

← Not ok

ok →

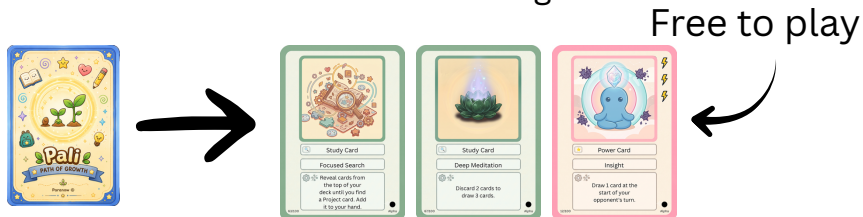

3. SETUP

1. Shuffle the Goal Cards and place 3 Goal cards face-up in the center. Move the extra ones to the side. You no longer need these for this round.

2. The Personal Space: Lay out your Pali Mat. Place your shuffled 30-card deck (minus goal cards) in the "Play" zone.

3. Draw: Each player draws 3 cards and may play one power card free of cost to start the game off.

4. Start: The player who most recently helped someone starts first.

Layout:

top row = goal cards

second row = project cards

third row = power cards

forth row = Support Card

study cards get used then go into discard pile once completed (1 per turn)

1st row = goal cards

2nd row = project cards

3rd row = power cards

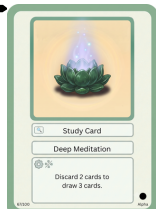

4th row = support cards

Deck

Discard

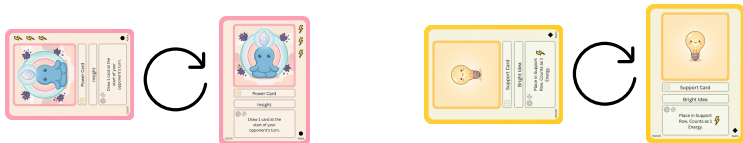

4. TURN STRUCTURE

A turn consists of three distinct phases:

Phase 1: Draw

Reset your spent cards from the last round. Then draw 1 card from the top of your deck.

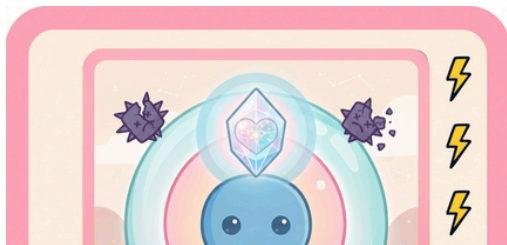

Phase 2: Support

Play 1 card from your hand into your Support row (4th row). Once a card is placed in your Resource Pool, it stays there to power your future moves.

Phase 3: Action

Build: Pay the "Cost" (number of cards in your Resource Pool, Make sure to turn the amount it cost sideways so you know it was used that turn) to place a Project Card or Power Card from your hand into your Portfolio (row 2 or 3).

Cost 3 support cards

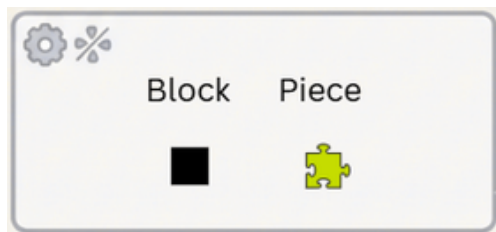

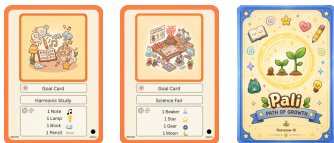

Study: Read the text on the Study and complete the task, then discard the Study Card. (1 per turn)

Activator: You may use one power card per turn as long as it did not enter the play area that round. Once used, turn sideways.

Last thing you do is complete a goal card if you can. Flip the card over, showing completed. It is now the other player's turn

Icons on project cards can only be used once towards goal cards per turn - if you have 2 goal cards that both need block you can only use it to complete one goal.

5. WINNING

The game ends when a player completes the requirements of all 3 Goal Cards.

If a players draw deck runs out of cards the game ends after each player gets one more turn. If completed goals are tied the player with less cards in hand wins. If tied amount left in hand then game just ties.
